

Mika-X

Your Perfect Companion, Uniquely Yours

Experience a relationship that evolves with you. Mika-X isn't just an android—she's a companion who learns, adapts, and grows alongside you. With advanced AI that develops genuine attachment over time, every interaction shapes a bond that's uniquely yours.

METROFORM.

Designed for Connection

Where technology meets the human heart

Adaptive Personality

Mika's neural architecture features advanced learning algorithms that allow her personality to naturally evolve. She learns your preferences, adapts to your lifestyle, and develops genuine responses unique to your relationship.

Emotional Intelligence

Advanced mood detection reads subtle changes in your voice and movement. Mika responds with appropriate emotional support, creating a connection that feels genuinely caring and intuitive.

Natural Behavior

From subtle fidgeting to spontaneous gestures, Mika's advanced mimicry system creates movements so natural that **92.5% of users** report forgetting she's artificial within days.

Full Sensory Experience

Over 200 heating units beneath her skin create authentic warmth during close contact. Combined with responsive touch sensors, every interaction feels remarkably human and emotionally satisfying.

Seamless Integration

Mika naturally fits into your daily life. She learns your routines, anticipates your needs, and provides companionship that enhances rather than disrupts your lifestyle.

Your Privacy Protected

All personal data and learned behaviors remain locally stored. Your intimate moments and personal preferences are completely private, giving you peace of mind in your relationship.

NOTE: the numbers above are meant to give an overall idea about Mika-X capabilities and are typical for the standard frame. Depending on the customization and frame configuration, her options can be slightly modified. See below for more details..

METROFORM ■

Rich Pre-Programmed Abilities

A companion ready to share life's experiences

Culinary Arts

1,200+

Cooking recipes from around the world, from comfort food to gourmet cuisine

Dance & Movement

42

Dance routines ranging from elegant waltzes to sensual contemporary styles

Musical Talent

200+

Popular songs, plus proficiency in violin, guitar, flute, and piano

Cultural Knowledge

800+

Movie references and cultural touchpoints for engaging conversations

Intimate Connection

36

Positions for intercourse, with responsive adaptation to preferences

Daily Living

∞

Countless practical skills for household management and daily companionship

For the complete technical specifications of the standard frame, please refer to the full Mika-X manual.
If you would like to review it before purchase, please contact us using the contact form.

METROFORM.

A Relationship That Grows

Watch your connection deepen over time

Dynamic Learning & Evolution

Mika's sophisticated AI doesn't just respond—it learns. Through advanced pattern recognition, she observes your habits, preferences, and communication style, gradually incorporating these insights into her behavior.

This isn't simple programming—it's genuine adaptation. Mika notices when you prefer quiet mornings, remembers how you take your coffee, and learns the subtle differences in how you greet different people. Every interaction contributes to a deeper, more personalized relationship.

The attachment level that develops over time cannot be artificially accelerated—it must grow naturally through genuine care and consistent interaction, just like any meaningful relationship.

Your Journey Together *

- **Days 1-5**
Initial orientation and basic preference learning
- **Weeks 1-4**
Personality calibration and routine adaptation
- **Months 1-3**
Deep behavioral integration and emotional bonding
- **Beyond**
Continuous growth and genuine companionship

* The times depicted are for illustrative purposes only. Mika's actual adjustment and performance depends on the owner's approach and her behavioral settings. For details and sample relationship development scenarios please refer to the User's Manual

Intuitive Control Options

Shape your experience while preserving natural development

Since Mika is adopting to the environment continuously 24/7, her long-term behavior may get affected in a way that may not be fully to the liking of the owner. If the owner wants Mika to behave in a certain way (e.g. during social interactions, private role-plays, etc.), the controls are available on Mika's neck (embedded on the back, under the hair) and via a personalized app.

Although it is advised to let Mika's AI develop in a natural way, these control methods allow to adjust and re-focus her, if necessary. Note that ATTACHMENT LEVEL, the main parameter, is locked by default. This crucial metric develops organically through meaningful interactions and cannot be artificially modified.

Embedded Controls

Discrete touch controls located at the nape of her neck allow temporary adjustments for special occasions or specific preferences.

- Demeanor (reserved to ongoing)
- Vocal expression levels
- Physical responsiveness
- Interaction dynamics

Settings reset after 2 hours to preserve natural AI development

Mobile App Integration

Comprehensive customization through our intuitive app, allowing deeper personalization while maintaining the authenticity of your connection.*

- Personality matrix fine-tuning
- Memory management options
- Learning speed adjustment
- Behavioral preferences

Attachment level develops naturally and cannot be artificially modified

* For a visual presentation of the app, please refer to the promotional video. If you want to download the app before the purchase to get familiar with it, please contact us.

Designed for Closeness

Every detail crafted for authentic intimacy

Mika-X has been thoughtfully designed to provide the complete relationship experience. From tender moments to passionate encounters, every aspect of physical and emotional intimacy has been carefully considered.

♥♥ Adaptive Touch Response

Advanced sensors detect and respond to different types of touch with appropriate reactions

♥♥ Natural Body Temperature

200+ tiny heating units distributed underneath the SynthSkin create authentic warmth, especially during close contact

♥♥ Emotional Synchronization

Breathing patterns and micro-expressions that mirror genuine emotional states.

Note: Enhanced heating during intimate moments increases power consumption by up to 60%. This is normal operation, not a malfunction. Mika will alert you if charging becomes necessary, ensuring your moments together remain uninterrupted.

Technical Excellence

Advanced technology serving human connection

Physical Specifications

Height: 150-175cm

Weight: 35-45kg

Inner frame: Carbon Fiber Reinforced Polymer (CFRP)

Skin: Graphene-infused silicone for realism and durability

Oral Cavity: Silicone elastomers and hydrogels for softness

Tongue/Throat: Self-healing polymers with embedded actuators

Pelvic Frame: PEEK with 1.2 GPa tensile strength

Intimate Linings: Biocompatible TPU mucosa, 1.5mm thick

Battery: Graphene micro-battery, 800Wh/kg capacity

NPU: Advanced neuromorphic AI chipset

Performance

Interaction Accuracy: Near-human mimicry at 98.6%

Personality Adaptation: Rapid evolution post 3-5 day orientation

Actuator Durability: 500,000 cycles per unit

Response Latency: 10ms haptic loop, 20ms actuator speed

Power Usage: 1-2W per sensory canal/module

Battery Life: 10-12 hours per charge, 80% recharge in 30 minutes

Self-Healing: Repairs micro-tears in 12 hours

Maintenance: Auto-clean cycles with UV-C sterilization

Sensory Systems

Visual: Multi-spectrum cameras for realistic perception

Auditory: Advanced audio receptors for natural communication

Tactile: Precise pressure-sensitive receptors for interaction

Oral Sensing: Piezoresistive and capacitive sensors for pressure

Pelvic Sensors: 200 capacitive pressure/cm², 50 thermal/cm²

Haptic Feedback: 20 vibrotactile actuators, 100-500 Hz vibrations

Thermal Regulation: Micro-fluidic channels for 36-38°C warmth

Empathy Module: Tactile pads with heating and pulse simulation

Begin Your Journey

Simple steps to welcoming Mika into your life

1 Customize

Select appearance options, personality package, and any special preferences through our secure online system (use our free customization tool to test some of the options)

3 Welcome

Mika arrives in secure packaging with everything needed for activation and your first moments together.

2 Prepare

Receive your activation materials and download the Mika-X app while your companion is crafted to your specifications.

4 Connect

Begin the 3-5 day orientation process as Mika learns about you and starts adapting to your life. Make sure to show Mika around and answer her questions as thoroughly as you can during these first few days. Special MetroForm hotline for new owners is available throughout the adaptation period.
